

# Abarth Chrome Replacement Kit

## INSTRUCTIONS

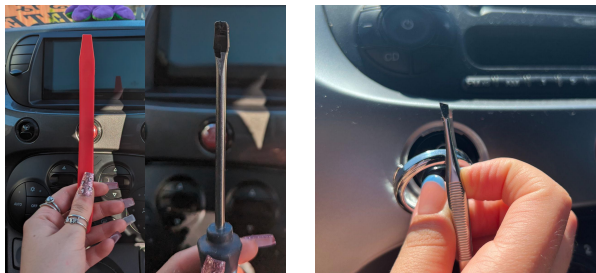

### Before Installation:

- Please ensure you have some sort of trim removal tool whether that's a flathead screwdriver with some tape over the head, or even a pair of tweezers.

### Step 1.

Remove the chrome rings using a trim tool, screwdriver or even a pair of tweezers and hook the inside of the ring and pull. The chrome ring should just pop off!

### Step 2.

Once the chrome ring has been removed, take your new chrome ring and line up the prongs. Two big at the top, one small at the bottom.

### Step 3.

Apply pressure to the ring until you hear the 'click'. The chrome ring should then be clipped in and secure.

### Step 4.

Continue these 3 steps on the remaining chrome rings and admire your new dashboard!

Thank you for your purchase with us!
